DETAILED ACTION

Allowable Subject Matter

Claims 1-42 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1, 11, 21, 31, 41 and 42 teach towards a means, method and system for a wireless system with a mobile station for providing improved teleservice payload handling comprising receiving, at a network sending entity, an indication of a maximum teleservice message payload size that can be sent by the sending entity, the message to be sent to a mobile station via a network receiving entity serving the mobile station, and using the payload size to automatically format messages at the sending entity to be sent to the mobile station, wherein the payload is originated at the receiving entity as a message parameter in standard registration with the mobile station. That is, upon registration with the receiving entity by the mobile station, the receiving entity uses a standard registration message exchange to automatically notify the sending entity of the maximum payload size for message handling, after which the sending entity automatically reformats messages destined for the MS. Claims 2-10, 12-20, 22-30 and 32-40 are allowed as being dependent on the independent claims noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
